

the destroyer the sullivans anatomy of the ship

**the destroyer the sullivans pdf**

the destroyer the sullivans anatomy of the ship USS The Sullivans (DDG-68), an Arleigh Burke-class Aegis guided missile destroyer, is the second ship of the United States Navy to be named for the five Sullivan brothers – George, Francis, Joseph, Madison, and Albert Sullivan, aged 20 to 27 – who lost their lives when their ship, USS Juneau, was sunk by a Japanese submarine in November 1942 in the Naval Battle of Guadalcanal (the first ...

**USS The Sullivans (DDG-68) - Wikipedia**

the destroyer the sullivans anatomy of the ship In naval terminology, a destroyer is a fast, maneuverable long-endurance warship intended to escort larger vessels in a fleet, convoy or battle group and defend them against smaller powerful short-range attackers. They were originally developed in the late 19th century by Fernando Villaamil for the Spanish Navy as a defense against torpedo boats, and by the time of the Russo-Japanese War in ...
