he sees, touches, tastes, smells or hears helps to shape the brain for thinking, feeling, moving and learning.

Facts for Life - Child Development and Early Learning

the developing child using jungian type to understand children the word new international readers version the bible for understanding god Babbling is a stage in child development and a state in language acquisition during which an infant appears to be experimenting with uttering articulate sounds, but does not yet produce any recognizable words. Babbling begins shortly after birth and progresses through several stages as the infant's repertoire of sounds expands and vocalizations become more speech-like.
